 Perihal : Penawaran *International Master's Program in Electric Power Engineering (IMEPE)* dari *National Sun Yat Sen University, Taiwan*

ISI BERITA

Merujuk perihal pada pokok Berita, dengan hormat disampaikan hal-hal sebagai berikut:

1. KDEI Taipei telah menerima informasi mengenai penawaran *International Master's Program in Electric Power Engineering (IMEPE)* dari *National Sun Yat Sen University, Taiwan* untuk angkatan 2022. Program ini merupakan program internasional yang dapat diikuti oleh mahasiswa dari berbagai negara. Bahasa pengantar menggunakan bahasa Inggris. Tujuan program IMEPE adalah untuk menarik siswa internasional yang kompetitif untuk belajar mengembangkan kapasitas teknik tenaga listrik tingkat lanjut.
2. IMEPE menawarkan 3 jenis beasiswa, yaitu beasiswa dari *Taiwan International Cooperation and Development Fund (Taiwan ICDF)*, Otoritas Taiwan dan *National Sun Yat Sen University*.
3. Pendaftaran untuk mahasiswa internasional telah dibuka hingga tanggal 30 Maret 2022. Untuk informasi lebih lanjut dapat menghubungi nara hubung a.n. Sdri. Elaine Chen (Email: elaine.chen@mail.ee.nsysu.tw) dan merujuk pada *flyer* IMEPE terlampir.
4. Sehubungan dengan hal tersebut, mohon bantuan Kementerian/Lembaga terkait di Indonesia untuk dapat menyebarluaskan informasi mengenai IMEPE tersebut.

Demikian disampaikan atas perhatian dan kerja samanya diucapkan terima kasih.

Dear Sir / Madam,

Greetings! I am the Director of the International Master's Program in Electric Power Engineering (IMEPE) at the National Sun Yat-sen University (NSYSU) in Kaohsiung. I am writing to offer a great opportunity for students from your country to study in our Master's program with scholarship at NSYSU. IMEPE offers scholarships from the Taiwan International Cooperation and Development Fund (Taiwan ICDF) to students coming from countries that have diplomatic ties with Taiwan and also from the University.

The main goal of the IMEPE is to attract competitive international students to learn to develop advanced electric power engineering capacities, especially focusing on renewable energies, innovative power electronics and drives.

National Sun Yat-sen University was established in 1980 and became one of the most promising universities in Taiwan. NSYSU has entered the 151-200 rank band in the Young University Rankings 2019 by Times Higher Education, ranking the third among universities in Taiwan.

In the past 2020, Taiwan has accomplished its great achievement in anti-Covid19 and prosperous economic growth. We are proud of the normal daily living in Taiwan encountering the raging virus. NSYSU will be a safe, free, and inspiring campus to welcome international students from all over the world.

We prepare some flyers for sharing this information to students at your university and we would like you to please kindly help us to distribute these flyers to those who might be interested in our program.

For any additional inquiries, please do not hesitate to contact us.

Thank you so very much for your help!

Sincerely Yours,

Yao-Ching Hsieh

## International Master's Program in Electric Power Engineering

電機電力工程國際碩士學位學程

The Department of Electrical Engineering at the National Sun Yat-sen University offers a great opportunity for students to study master program with scholarship. The University is located in Kaohsiung, Taiwan, a metropolitan area with a population of more than 2.7 millions, and is one of the top research-intensive universities in Taiwan.

The International Master's Program in Electric Power Engineering (IMEPE) offers three types of scholarships, one by the Taiwan International Cooperation and Development Fund (Taiwan ICDF), the second is by Taiwan government and the third one is by the University.

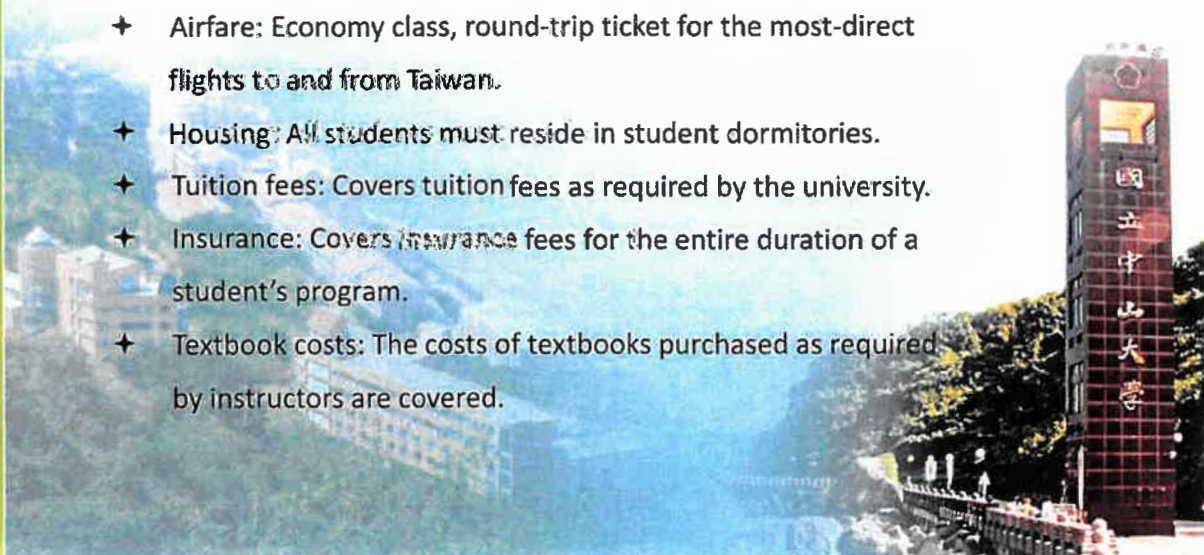

The main goal of the IMEPE is to attract competitive international students to learn to develop advanced electric power engineering capacities.

### ◆ Curriculums and Courses

Curriculums are tailored for international students. All courses are lectured in English. Students will be able to study the professional contents related to Electric Power Engineering (power system, electric machines, power electronics, networks and controls) as well as learn the Chinese cultures.

### ◆ Taiwan ICDF Scholarship includes:

- ✦ Each student receives NT\$15,000 per month.
- ✦ Airfare: Economy class, round-trip ticket for the most-direct flights to and from Taiwan.
- ✦ Housing: All students must reside in student dormitories.
- ✦ Tuition fees: Covers tuition fees as required by the university.
- ✦ Insurance: Covers insurance fees for the entire duration of a student's program.
- ✦ Textbook costs: The costs of textbooks purchased as required by instructors are covered.
